Science Club

Wednesday 15th April – 20th May. 6 weeks, £6.50 per week. Limited spaces. Visit www.superscientists.co.uk to book. All childcare vouchers

The Science Club

We run a primary School Science club, set up with the aim to make science fun and practical for everyone!

From assembling robots to investigating the viscosity of goeey liquids, and much more...

At our science clubs we have enough equipment for all, which is routinely cleaned, checked and tested so it always performs at it's best!

The club is an hour of mind-blowing science, after school, once a week.

Science club will be either in the school hall or a classroom.

After every session, little Super scientists will be given a practical pack, designed and assembled by us. Pictures of completed practical packs will be rewarded with 'sciencey' prizes and a clap from the class. We get lots of pictures of the packs being completed with parents too!

At the end of the science club block, a certificate is awarded to students to recognise their new scientific abilities!

Meet Our Team

Our lead Super Scientist is Kerry. She has 30 years of teaching experience which ended with her creating Super Scientists back in 2017. With a biology degree, Kerry is our biologist and qualified S.E.N.C.O.

Our next Super Scientist is Chris. Chris has worked in a lab for over 15 years! During his previous career, he trained many scientists and is now the Chemist of our team.

The youngest Super Scientist is Stephen. Who, inspired by his parents' passion for science, has chosen to do a STEM degree (Science, Technology, Engineering and Maths). He is the brains behind all things Physics!
