

4.8 (WE'RE GOING TO) JUMP AROUND THE CLOCK!

Objective: Counting forwards and back in 6s and 8s.

Instructions

1. Set out large number cards from 1 to 12 in a big circle on the floor, so that it looks like a clock - 12 at the top, 6 at the bottom, etc.
2. Jump around the clock from one number to the next, starting at 1, shouting the 6 times table as you go - say '1 times 6 is 6, 2 times 6 is 12', and so on.
3. Can you jump and count down in 6s as well, from '12 times 6 is 72' and back round the clock to '1 times 6 is 6'?
4. Practice the 5 times table as well - this will help when telling the time.
5. Try beating your time every time you jump around the clock.

Challenge

Jump around the clock again - but count in 8s this time. Can you count back round again in 8s, starting at 12 times 8?
